EUROPEAN DEFENCE FUND

Assessment after three calls for proposals

The first section of this special edition provides an overview of the projects selected under the [European Defence Fund \(EDF\)](#) after three calls for proposals. It presents statistics over a three-year period as well as a focus on the results of the 2023 call for proposals.

As a reminder, previous FRS reports propose an equivalent approach for the years [2021](#), [2022](#) as well as for projects selected under the precursor programmes - [Preparatory Action on Defence Research \(PADR\)](#) and [European Defence Industrial Development Programme \(EDIDP\)](#).

This work is based on data made public by the European Commission (Directorate-General for Defence Industry and Space, DG DEFIS), and for some projects on information provided by the European Defence Agency (EDA) and the Organisation for Joint Armament Cooperation (OCCAR). The statistics on consortia members are based on the data provided in the individual project factsheets (these can be consulted by clicking on the project acronym in column 1 of the tables on pages 6 to 16). It is important to note, as pointed out by DG DEFIS, that *“the individual project factsheets represent the proposals that will be invited to grant agreement preparation”*¹. The figures for 2023 are therefore preliminary. Once the grant agreements have been signed, this report will be consolidated in the first half of 2025 (but these are generally marginal adjustments).

Readers may also notice a difference between the overall participation statistics provided by DG DEFIS² and the statistics presented in this report. Our scope is limited to the beneficiaries of the consortia, as this is the only data available. In its overall statistics (see table below), the European Commission includes the beneficiaries as well as the “affiliated entities” (this notion has replaced that of “linked third party”) and “subcontractors”; these last two categories of participants³ are not named in the individual project factsheets. Unnamed legal entities (affiliated entities + subcontractors) will account for 21% of all legal entities in 2021, 28% in 2022 and 13% in 2023.

After an overview of all selected projects (from page 6 to 18), the statistics and graphs from page 19 onwards relate exclusively to collaborative research and development projects. We do not take into account specific projects such as Coordination and support action (CSA), Framework partnership agreement (FPA) and direct award project (except for two graphs on pages 34 and 35).

Detailed lists of individual data by beneficiary are provided in the fourth section of this special edition (page 66).

GLOSSARY

Legal entity	<p>A legal person created and recognised as such under Union, national or international law, which has legal personality and the capacity to act in its own name, exercise rights and be subject to obligations, or an entity which does not have legal personality as referred to in point (c) of Article 197(2) of the Financial Regulation (<i>“entities which do not have legal personality under the applicable national law, provided that their representatives have the capacity to undertake legal obligations on behalf of the entities and that the entities offer guarantees for the protection of the financial interests of the Union equivalent to those offered by legal persons. In particular the applicant shall have a financial and operational capacity equivalent to that of a legal person. The representatives of the applicant shall prove that those conditions are satisfied”</i>).</p> <p>A legal entity is identified by a PIC number (<i>“Participant Identification Code”</i>; for any organization applying for European funds, a PIC number is needed). Depending on the legal structure of a company, the head of the group and its subsidiaries may each have their own PIC number (this is the case for Thales and Rheinmetall, for example).</p>
Participant	A legal entity participating in EDF projects (legal entity carrying out an action or part of an action, having rights and obligations with regard to the European Union). Participants include the <i>“beneficiaries”</i> , <i>“affiliated entities”</i> , <i>“associated partners”</i> or <i>“subcontractors”</i> participating in the action.
Participation	The act of involvement of a legal entity in EDF Projects. A single participant can be involved in N projects and therefore being counted as N participations.
Beneficiary (or Recipient)	A legal entity with which a funding or financing agreement has been signed or to which a funding or financing decision has been notified. Member of a consortium.
Affiliated entity	The notion of <i>“linked third party”</i> has been replaced by the notion of <i>“affiliated entity”</i> . An entity that have a link with a beneficiary, in particular a legal or capital link.
Subcontractor	Entity contracted to perform activities which are part of the action and involving customisation and development of new know-how for the purpose of an action receiving funding irrespective of the tier at which they are contracted.
Associated partner	A legal entity established outside the territory of Member States or of associated countries (Norway) or controlled by a <i>“non-associated third country”</i> or by a <i>“non-associated third country entity”</i> , without having fulfilled the requirements for a derogation on control, with who a <i>“beneficiary”</i> , an <i>“affiliated entity”</i> or a <i>“subcontractor involved in the action”</i> cooperates for the purpose of the action, including by using its assets, infrastructure, facilities and resources.
Consortium	<p>A collaborative grouping of beneficiaries (or recipients) that is subject to an agreement and constituted for the purpose of carrying out an action under the Fund.</p> <p>The EDF Regulation (Article 10.4) lays down that an action must be carried out by <i>“legal entities”</i> cooperating within a consortium of at least 3 eligible <i>“legal entities”</i> which are established in at least 3 different Member States + Norway (2 for disruptive call).</p>
Coordinator	A legal entity which is a member of a consortium and has been appointed by all the members of the consortium to be the principal point of contact for the purpose of the consortium’s relations with the Commission.
Research action	An action consisting primarily of research activities, in particular applied research and where necessary fundamental research, with the aim of acquiring new knowledge and with an exclusive focus on defence applications.
Development action	An action consisting of defence-oriented activities primarily in the development phase, covering new defence products or technologies or the upgrading of existing ones, excluding the production or use of weapons.

ACT IN SUPPORT OF AMMUNITION PRODUCTION

Results and beneficiaries
following the first calls for proposals

© European Commission

The second section of this special edition provides an overview of the projects selected under the [Act in Support of Ammunition Production](#) (ASAP) regulation. After the first calls for proposals, the European Commission announced the selection of 31 projects in march 2024 (overall allocated EU budget of around €500 million). The selected projects cover five areas: explosives, powder, shells, missiles and testing. ASAP regulation “*aims at reinforcing and ramping up ammunition production across Europe*”¹.

The tables, graphs and maps below are based on data made public by the European Commission (Directorate-General for Defence Industry and Space, DG DEFIS), in particular through the [ASAP Results Factsheet](#). This work also uses data from the FRS's EDTIB database.

- ◆ Selected projects, categories, EU funding, partners.
- ◆ Selected projects by category and country (number and %).
- ◆ Map of participations and beneficiaries.
- ◆ Beneficiary profile. Focus on parent company or main shareholder.

ECONOMIC DATA FOR THE EUROPEAN COMPANIES with the largest presence in EDF and ASAP projects

The objective of the third section of this special issue is to highlight the companies (PRCs; SMEs not included) most involved in the EDF and ASAP projects. To create this panel, we have selected companies with more than 3 participations in EDF projects and/or those in a position of EDF project coordinator. We have also included all the companies involved in ASAP projects.

The table below provides data on global turnover and workforce for the years 2022 and 2023, as well as the defence sales share (%) for the year 2023. In instances where data on defence sales is unavailable, we have estimated this figure by cross-checking information from various sources, including declarations and press articles. However, there are still cases where this estimate is made difficult by a lack of information (indicated N/A in the table). In the table, the data sources are indicated in the 'References' columns, with direct access via clickable links.

EDF PROJECTS: INDIVIDUAL DATA BY BENEFICIARY

Detailed lists

The fourth section of this special edition contains the detailed lists relating to individual data by beneficiary (EDF 2021-2022-2023 collaborative research and development projects):

- ◆ List of PRC beneficiaries with 3 or more participations
- ◆ List of PRC beneficiaries with 1 or 2 participations
- ◆ List of SME beneficiaries, by country
- ◆ List of REC beneficiaries, by country
- ◆ List of HSE beneficiaries, by country
- ◆ List of PUB-OTH-NGO beneficiaries, by country

These lists compile all data made public by the European Commission (Directorate-General for Defence Industry and Space, DG DEFIS), and for some projects, by the European Defence Agency (EDA) and the Organisation for Joint Armament Cooperation (OCCAR). As emphasised in the first section, our scope is limited to the beneficiaries of the consortia, as this is the only data available. “Affiliated entities” (this concept has replaced that of “related third parties”) and “subcontractors” are not indicated in the individual project sheets provided by DG DEFIS.
